
Cycle–area (sliced instruction simulation)
simulated: prefill max r (v1 slices)
simulated: decode max r (v1 slices)
1.11 mm² budget
H0+S0
A = C joint
B joint
Cycle ratio r = T / T0 (log)
Unified area estimate (mm²)
Prefill–decode trade-off (★ joint, ▲ HW-only, ▼ SW-only)
area-feasible simulated designs
B joint
A = C joint
Decode max r (D128, D512)
Prefill max r (P128, P512)
